Education

Northeastern University, *Master's in Information Systems*, Boston, USA

Dec. 2023

- Coursework: Data Management and Database Design, UI/UX, Web Design, Data Science Engineering Methods, Data Structures

Technical Skills

Programming languages	: Python, SQL, R, Java, HTML5, CSS, JavaScript, MATLAB, ETL/ELT
Databases	: MS SQL, Vertica, Snowflake, Oracle, MongoDB, NoSQL, Big query, PostgreSQL, GCP
Libraries and Packages	: Keras, TensorFlow, PyTorch, Flask, PPTx, NumPy, SciKit Learn, lambda functions, PySpark
Visualizations	: Tableau, Power BI, Excel, Informatica, Alteryx, Spark, Looker
Other	: GIT, dbt, Collaborative, Focused, Ownership, ETL, Hadoop, Spark, BI tools, Product Development, DAX

Work Experience

Amazon, Boston, MA, USA, *AI Content Specialist*

Jul. 2024 – Present

- Adapted to fast-paced, entrepreneurial environments by supporting multiple teams through training, project management, and quality reviews, ensuring alignment with team goals and business needs
- Enhanced quality by conducting thorough reviews, proofreading, and delivering training to improve team performance

Mimecast, Lexington, MA, USA, *Analytics Engineer intern*

Jan. 2023 – Aug. 2023

- Designed and managed scalable data systems by developing and optimizing dbt models and CI/CD pipelines in Snowflake, reducing ELT runtime from 12 hours to under 20 minutes, significantly improving data integrity and operational efficiency.
- Enhanced data quality and governance by leading the migration of Tableau workbooks and flows from Tableau Server to Tableau Cloud, achieving a 40% reduction in migration time and resolving systemic data quality issues
- Crafted customer-focused data solutions by processing GraphiQL queries to identify 10 high-impact workbooks, enhancing data usage efficiency and providing actionable insights to stakeholders

Northeastern University, Boston, USA, *Business Analyst*

Aug. 2022 – Jan. 2023

- Automated Snowflake ETL/ELT processes using Alteryx Designer, dbt and Informatica Cloud, achieving an 80% efficiency increase, showcasing skills in database scalability and performance enhancement
- Created a real-time Tableau dashboards that enabled finance teams to identify cost-saving opportunities, reducing operational expenses by 15% and saving 20+ man-hours per week through data-driven insights

HP Inc., Bangalore, India, *Data Scientist*

Jan. 2020 – Jan. 2022

- Spearheaded the development of a custom BERT model using NLP and LLMs for multi-hierarchy issue detection, efficiently processing 30M requests/year across 50+ languages; executed sentiment analysis on social media text with PyTorch, driving actionable insights from customer reviews
- Directed a CX team in developing a Python pipeline and Tableau dashboard for HP's global printers, slashing resolution time by 20%, saving \$1.5M annually, and reducing Databricks GPU cluster costs by \$10,000/month through strategic error analysis
- Pioneered the creation of a Python ETL data pipeline in Azure Databricks, achieving a 90% automation rate for weekly data loads, exemplifying leadership in big data processing and database management excellence
- Delivered end-to-end analytics, from problem statement to model deployment, and created a Tableau dashboard, reducing customer support issues by 25% and earning recognition for strategic insights in the Weak Signals project

Academic Projects

Customer Complaint Management Database System | *SQL, Tableau, Database management, Oracle – PL/SQL* 🦋

- Designed and implemented a customer complaints management database in Oracle, incorporating ER diagrams, normalized schema, and ACID transactions to efficiently track, analyze, and resolve product, account, payment, and service-related issues within warranty periods, leading to improved customer satisfaction

Building a Robust API | *JSON, Elastic Search, Redis, Springboot, Postman, MongoDB, VSCode*

- Implemented a REST API for structured JSON data with CRUD, merge, and delete functionalities, ensuring data validation and providing a detailed JSON schema for the use case

Amazon Product Review Text Mining | *Python, Statistics, Data cleaning, Pandas, NumPy* 🦋

- Employed a python based verbatim analysis with PyATE framework to identify and address common electronic product issues, leading to improved product quality assessment and increased customer satisfaction
